Forecast For Wales
Issued by Met Office Exeter
at 0400 on Wednesday 16 Jun 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Rather cloudy and occasionally damp in the west. Brighter east.

Today:
Cloudy start in the west, which spreads inland through the day. Still plenty of sunny spells to be seen, bringing high temperatures in the east. Light rain or drizzle remains mostly confined to the west and over high ground. Maximum temperature 21 deg C (70 deg F).

Tonight:
Largely dry this evening but occasional spots of drizzle. Feeling quite muggy overnight as showers quickly move in from the south, these heaviest in the south then east, possibly thundery. Minimum temperature 10 deg C (50 deg F).

Thursday:
Heavy showers in the east clear northwards by the late morning, leaving behind a cloudy and cooler day here. Clear skies develop along the coastlines, and eventually inland later. Maximum temperature 19 deg C (66 deg F).

Outlook for Friday to Sunday:
Clear start on Friday, but quickly turning cloudy with showers, heaviest in the east. The odd shower but mostly dry and bright Saturday. Heavy and possibly thundery showers return Sunday.
